Collapse of the Climate House of Cards

Introduction

Just as we were preparing for this AGM, CLINTEL issued an Open Letter to Dr. Hoesung Lee, Chair of the Intergovernmental Panel on Climate Change (IPCC) regarding the many errors found by CLINTEL’s analysis of the IPCC AR6 reports. This augurs well for the “Collapse of the Climate House of Cards.”

Page | 3

CLINTEL also publicly condemned the IPCC for letting UN Sec. Gen. Antonio Guterres frighten the public with statements that were **not** made in the IPCC reports, nor did they represent the scientific findings of the report. This is the ‘beginning of the end’ for the climate cult. CLINTEL has provided everyone with clear evidence of the lack of the scientific method’s application at the IPCC, the UN, and financial institutions worldwide.

This ‘Big Book of Blog Posts’ is a bit smaller than usual as we have moved our AGM from the fall into the spring, which our members prefer for attendance. However, the collection of posts is representative of our vast scope of work for this little band of warriors! We feature three stories off the top – the CLINTEL letter to Dr. Hoesung Lee, “May is Wildfire Month in Alberta” – an explainer video and power point, and “Fault Lines at the CBC” – one of our deconstructions of CBC’s climate propaganda reports.

The rest of the document provides a chronological list with the **title of the blog post**, author and brief description, and if you are viewing the pdf on-line, you can click on the ‘Continue reading’ link to go to the full story. Enjoy!
